

A decorative dotted line in white starts from the bottom left, curves upwards and to the right, then loops back to the left, and finally curves downwards and to the right, ending with a white paper plane icon in the top right corner. Along this path are several colored circles: a light blue circle near the start, a green circle, a purple circle, a magenta circle, and a light blue circle near the end.

CREATIVE WORKFLOW PROCESS

PROPOSALS - JAN 2023 - Ver 02

WORKFLOW OVERVIEW

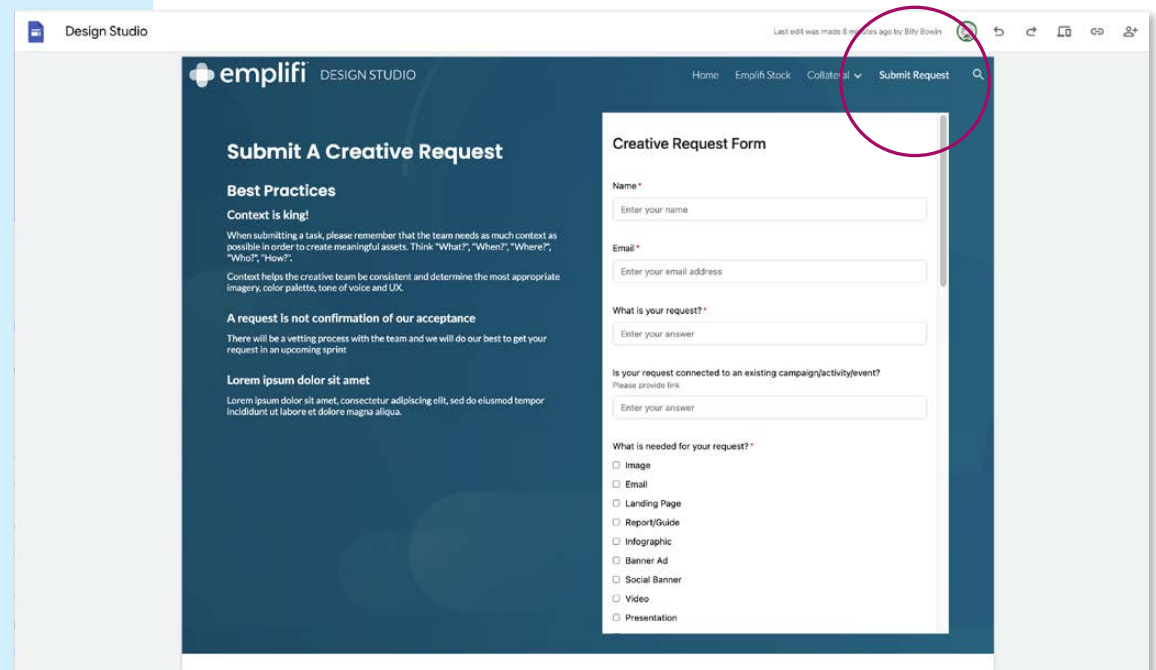

STEP 01

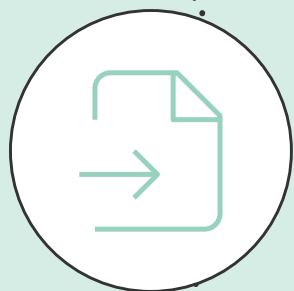

Creative request form:

From the Emplifi Design Studio Portal those with Creative requests will select 'Submit Request' and complete the form.

A Project Manager will confirm acceptance of the request and confirm if the job can be included in the current or next sprint.

03 | CREATIVE WORKFLOW PROCESS

STEP 02

Booking in and job number allocation:

The job will now be 'booked in' - firstly within the job database and then entered into the relevant 'sprint' in Asana using the same job number.

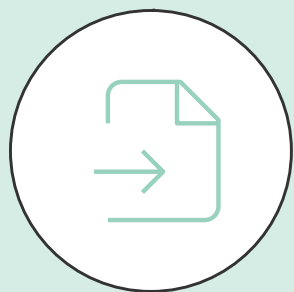

Using the database set up on Google sheets, incremental job numbers are auto allocated to each new job starting EMP001 >. Jobs are manually added to the database by selected team members.

STEP 02

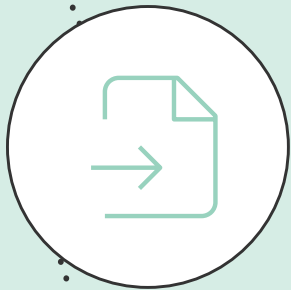

Job category codes:

Next step is to choose the job category from a drop down menu in the database. The 2-letter category code will form part of the final job naming protocol in addition to the job number.

Choose MS (Miscellaneous) if the job does not fit within any category OR we can add new codes if needed.

STEP 02

Job sequence number:

To keep the sequence of historic and existing job numbers on collaterals such as guides - e.g. GU013 - we will continue to use an incremental numbering system where applicable. Enter N/A or leave blank if this does not apply to a new job booked in.

Complete remaining fields.

STEP 02

Job-naming protocols:

The final job name is made from a combination of allocated job number + job category code + job sequence number (if applicable) + Cloud Solution (if applicable) + succinct but clear name of the job + month + year - separated with hyphens (not em spaces or underscores) as examples shown opposite.

The same job number and name should be used when jobs are booked into Asana.

SEPARATE WITH HYPHENS

INCREMENTAL EMPLIFI JOB NUMBER	CATEGORY CODE + SEQUENCE NUMBER \\\n(if applicable)	CLOUD SOLUTION CODE (if applicable)	SHORT CLEAR NAME OF JOB	MONTH + YEAR (NO SPACE)
--------------------------------------	--	--	-------------------------	-------------------------------

EMP002-SG-TikTok Playlist Post-DEC22

EMP003-LD-ESG Policy-DEC22

EMP004-DS6-SCC-Live Video with AR-DEC22

STEP 03

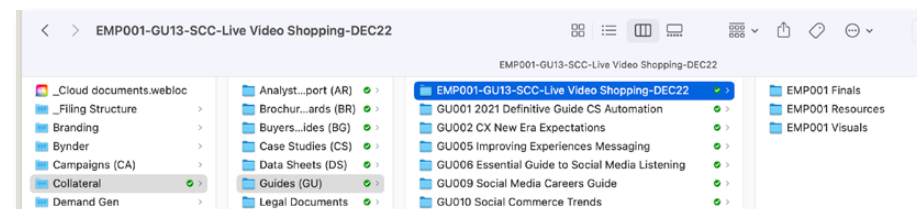

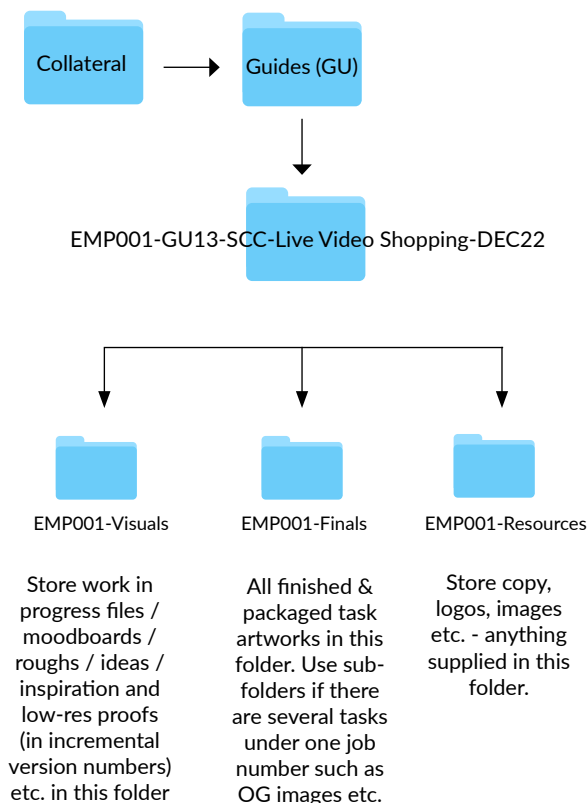

(This step mainly applies to Nicky, Elliot & Billy). In progress folder & file structure - keeping our house tidy!

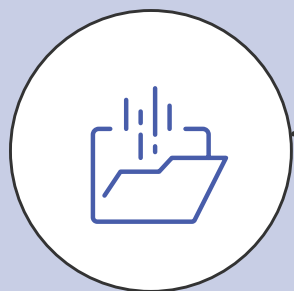

Using the same filing structure will help organise our files, facilitate search functions, ensure consistency and will be helpful in a team members absence should we need to locate any artworks.

Our working files will remain in the Creative Cloud broken down into folders as per the current set-up.

Opposite diagram shows the hierarchy and structure we should agree to adopt moving forward.

CREATIVE CLOUD

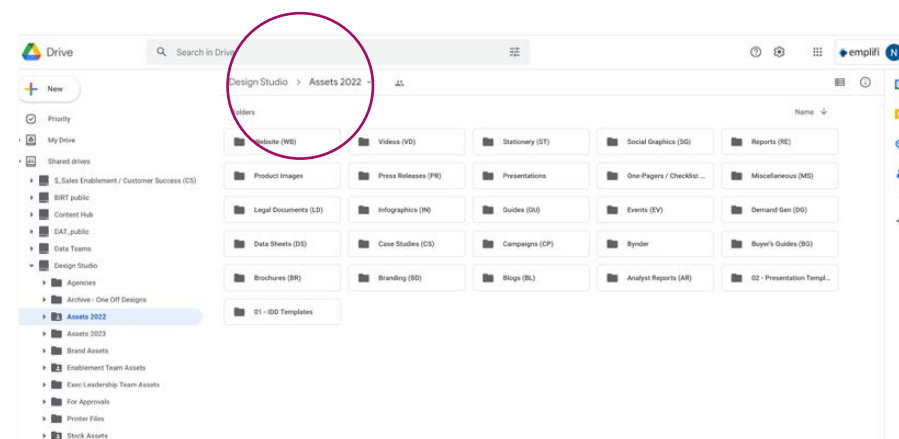

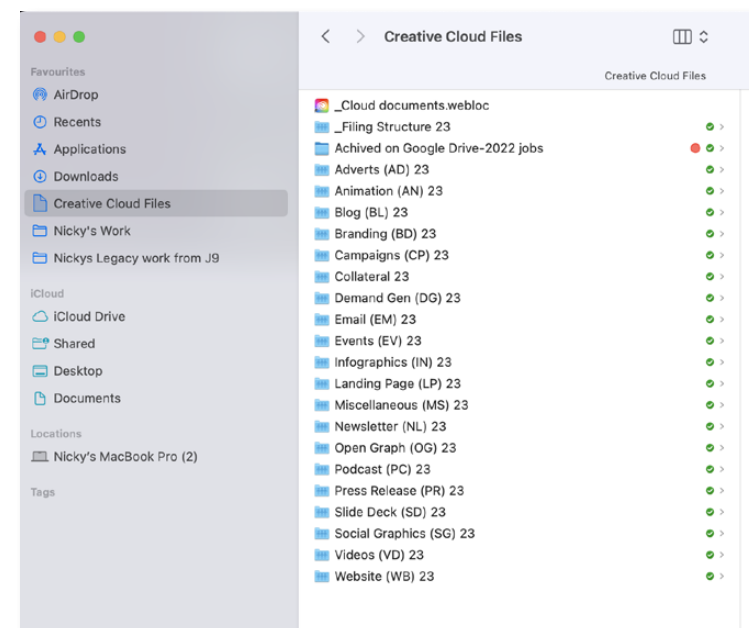

Creative cloud directory

Our creative cloud directory, which is accessible from your desktop computers, should now (hopefully!) look like the opposite diagram - all folders have a code and '23' so we know these are the new folder.

Previous artworks

I have archived the entire job catalogue that lived in this space previously from 2020>2021. All these files are now accessible on our shared Google Drive in Design Studio > Assets 2022 - Here is the link to all archived work: https://drive.google.com/drive/folders/1HnQuFvp_TM0gSJ4oN4DIfAjFUL6b4cC3

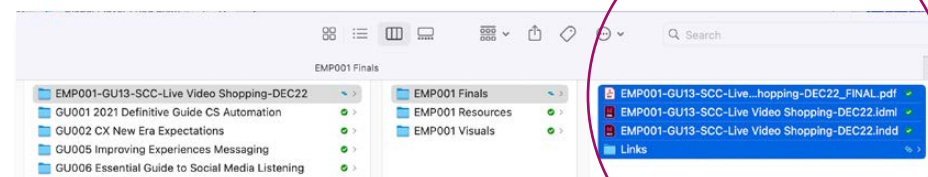

STEP 04

Job completion + final filing

On completion, jobs are 'packaged' up with all the links, editable files, final PDF and other final deliverables and kept in the 'EMPXXX Finals' folder. The rest of the folder should be 'cleaned' up and any files and folders (like Resources) not needed should be deleted. Keep worthy design concepts/visuals as these could be useful for future jobs - store these files locally on our machines

Example:

Final packaged files in the Creative Cloud:

STEP 05

Archiving

Finals should be stored in the shared Google Drive.

Design Studio > Assets 2023 > Relevant folder
(Guides in this case)

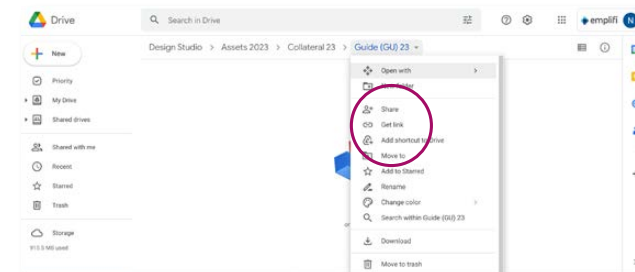

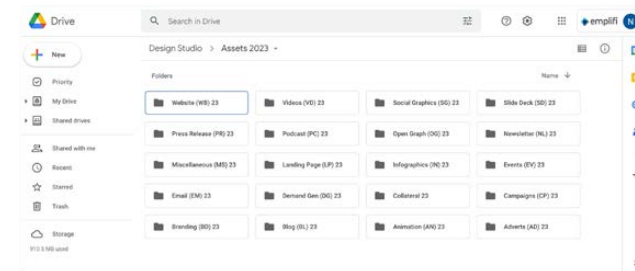

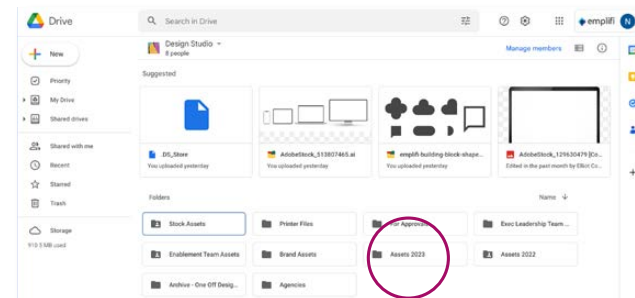

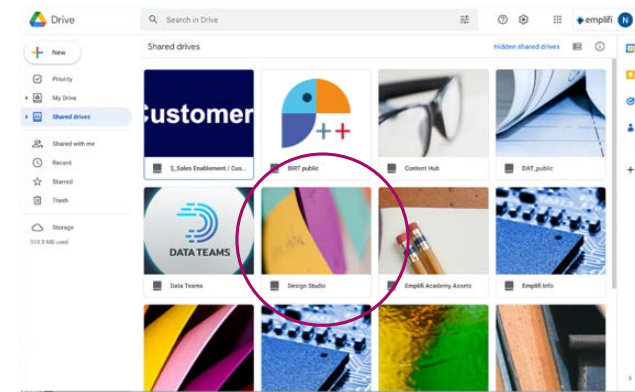

Call the folder by the full name - e.g:

EMP001-GU13-SCC-Live Video Shopping-DEC22

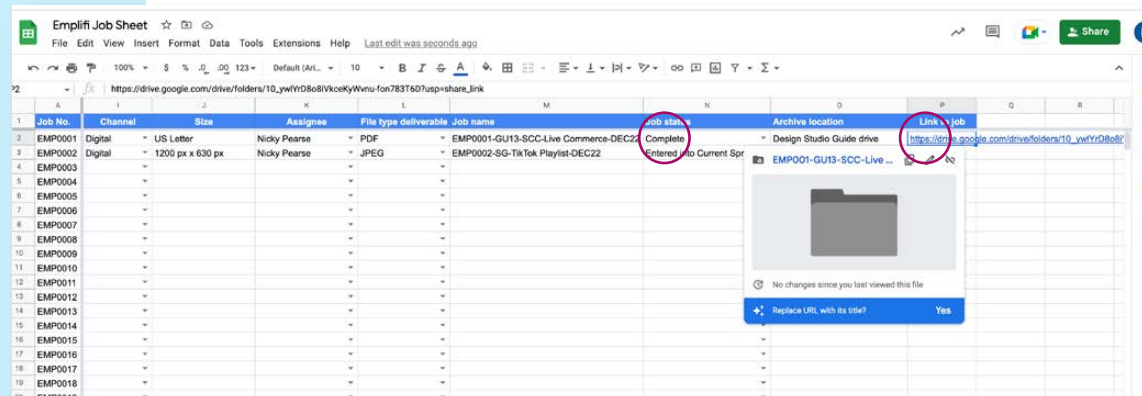

Add this final archive folder in this location.

Create a link to this folder - copy to the clipboard.

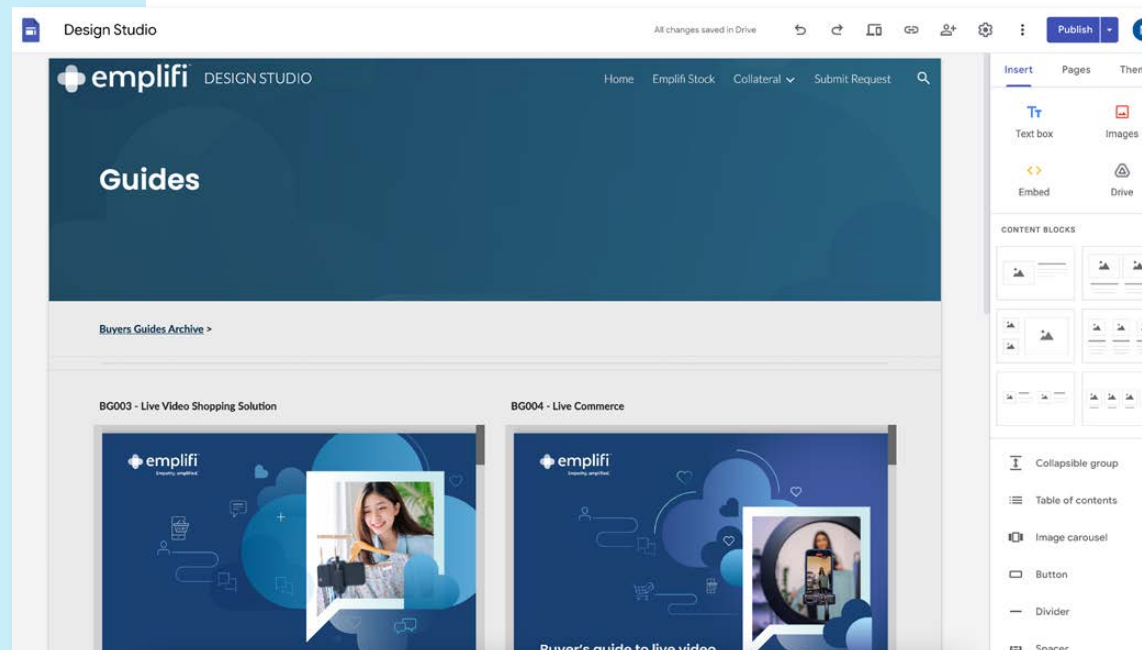

(Keep the work in the creative cloud directory too)

Mark job complete & add link to assets to database

Add job/link to Design Studio Portal (Billy advise)

STEP 05

Complete database info

With your link to the final folder copied to the clipboard - return to the Google Database and update the job status to 'complete', add the location of the final files and paste the link to the assets.

Add to Design Studio Portal

Lorem ipsum dolor (Billy please advise this step)

* Once a year/every 6 months (TBC) we'll clear down the work-in-progress files from the Creative Cloud.
